SATRO CONSTRUCTIONfest

Can you run a stand to showcase your business to inspire young people?

We run a construction programme for over 500 students in Surrey and the surrounding areas. This event is an opportunity for approximately 150 of those students to explore where their BTEC Level 1 qualification might take them, and supports their Careers & Personal Progression Unit.

WHEN: **Thursday 21st January 2027**

WHERE: **Surrey Sports Park, University of Surrey, Richard Meyjes Road, Guildford, Surrey. GU2 7AD**

TIME: **08.30 - 14.30**

This event aims to engage and excite students about the range of different roles and opportunities within the construction industry.

How can you help? We are looking for companies to provide the following activities on the day to circa 150 students keen to learn about your industry, including job opportunities and routes into your company. We split the students into small groups across the 3 sessions and students rotate around all 3 activities.

Pathways: 20-minute workshops on next steps e.g. apprenticeships, college courses and expectations of work in a company, repeated 3 times each session.

Company Stands: 10 minute interactive, hands-on activities that support an understanding of the the world of work, careers and your area of expertise in construction, repeated 5 times in each session.

Careers Speed Networking: Timed networking chats with a small group of students, giving them an insight to your background and career to date, this is an opportunity to chat and inspire students to follow in your footsteps. Students will move to the next person every 7 minutes!

Your support will help to inspire students and increase their confidence to take their next steps into the world of work.
